Modularity: Understanding the Development and Evolution of Natural Complex Systems (Vienna Series in Theoretical Biology)

Modularity—the attempt to understand systems as integrations of partially independent and interacting units—is today a dominant theme in the life sciences, cognitive science, and computer science. The concept goes back at least implicitly to the Scientific (or Copernican) Revolution, and can be found behind later theories of phrenology, physiology, and genetics; moreover, art, engineering, and mathematics rely on modular design principles. This collection broadens the scientific discussion of modularity by bringing together experts from a variety of disciplines, including artificial life, cognitive science, economics, evolutionary computation, developmental and evolutionary biology, linguistics, mathematics, morphology, paleontology, physics, theoretical chemistry, philosophy, and the arts.

The contributors debate and compare the uses of modularity, discussing the different disciplinary contexts of "modular thinking" in general (including hierarchical organization, near-decomposability, quasi-independence, and recursion) or of more specialized concepts (including character complex, gene family, encapsulation, and mosaic evolution); what modules are, why and how they develop and evolve, and the implication for the research agenda in the disciplines involved; and how to bring about useful cross-disciplinary knowledge transfer on the topic. The book includes a foreword by the late Herbert A. Simon addressing the role of near-decomposability in understanding complex systems.

From reader reviews:

Robert Robertson:

Here thing why this Modularity: Understanding the Development and Evolution of Natural Complex Systems (Vienna Series in Theoretical Biology) are different and dependable to be yours. First of all reading through a book is good but it depends in the content from it which is the content is as yummy as food or not. Modularity: Understanding the Development and Evolution of Natural Complex Systems (Vienna Series in Theoretical Biology) giving you information deeper as different ways, you can find any publication out there but there is no e-book that similar with Modularity: Understanding the Development and Evolution of Natural Complex Systems (Vienna Series in Theoretical Biology). It gives you thrill reading through journey, its open up your personal eyes about the thing that will happened in the world which is possibly can be happened around you. It is possible to bring everywhere like in playground, café, or even in your means home by train. Should you be having difficulties in bringing the published book maybe the form of Modularity: Understanding the Development and Evolution of Natural Complex Systems (Vienna Series in Theoretical Biology) in e-book can be your option.

Andre Todd:

Now a day individuals who Living in the era just where everything reachable by talk with the internet and the resources inside can be true or not need people to be aware of each info they get. How individuals to be smart in having any information nowadays? Of course the reply is reading a book. Reading through a book can help individuals out of this uncertainty Information especially this Modularity: Understanding the Development and Evolution of Natural Complex Systems (Vienna Series in Theoretical Biology) book since this book offers you rich data and knowledge. Of course the knowledge in this book hundred per-cent guarantees there is no doubt in it you may already know.

Wesley Binns:

The book Modularity: Understanding the Development and Evolution of Natural Complex Systems (Vienna Series in Theoretical Biology) has a lot details on it. So when you check out this book you can get a lot of gain. The book was compiled by the very famous author. Tom makes some research previous to write this book. That book very easy to read you will get the point easily after scanning this book.

Christina Webb:

What is your hobby? Have you heard that question when you got college students? We believe that that query was given by teacher with their students. Many kinds of hobby, Everybody has different hobby. And you know that little person such as reading or as reading through become their hobby. You have to know that reading is very important as well as book as to be the matter. Book is important thing to incorporate you knowledge, except your current teacher or lecturer. You see good news or update concerning something by book. Different categories of books that can you choose to adopt be your object. One of them is niagra
