Python 3 Text Processing with NLTK 3 Cookbook

Jacob Perkins

Python 3 Text Processing with NLTK 3 Cookbook Jacob Perkins

Over 80 practical recipes on natural language processing techniques using Python's NLTK 3.0

About This Book

- Break text down into its component parts for spelling correction, feature extraction, and phrase transformation
- Learn how to do custom sentiment analysis and named entity recognition
- Work through the natural language processing concepts with simple and easy-to-follow programming recipes

Who This Book Is For

This book is intended for Python programmers interested in learning how to do natural language processing. Maybe you've learned the limits of regular expressions the hard way, or you've realized that human language cannot be deterministically parsed like a computer language. Perhaps you have more text than you know what to do with, and need automated ways to analyze and structure that text. This Cookbook will show you how to train and use statistical language models to process text in ways that are practically impossible with standard programming tools. A basic knowledge of Python and the basic text processing concepts is expected. Some experience with regular expressions will also be helpful.

What You Will Learn

- Tokenize text into sentences, and sentences into words
- Look up words in the WordNet dictionary
- Apply spelling correction and word replacement
- Access the built-in text corpora and create your own custom corpus
- Tag words with parts of speech
- Chunk phrases and recognize named entities
- Grammatically transform phrases and chunks
- Classify text and perform sentiment analysis

In Detail

This book will show you the essential techniques of text and language processing. Starting with tokenization, stemming, and the WordNet dictionary, you'll progress to part-of-speech tagging, phrase chunking, and named entity recognition. You'll learn how various text corpora are organized, as well as how to create your own custom corpus. Then, you'll move onto text classification with a focus on sentiment analysis. And because NLP can be computationally expensive on large bodies of text, you'll try a few methods for distributed text processing. Finally, you'll be introduced to a number of other small but complementary Python libraries for text analysis, cleaning, and parsing.

This cookbook provides simple, straightforward examples so you can quickly learn text processing with

Python and NLTK.

From reader reviews:

Patsy Hall:

Now a day folks who Living in the era everywhere everything reachable by talk with the internet and the resources inside it can be true or not need people to be aware of each details they get. How a lot more to be smart in having any information nowadays? Of course the reply is reading a book. Looking at a book can help persons out of this uncertainty Information particularly this Python 3 Text Processing with NLTK 3 Cookbook book because this book offers you rich details and knowledge. Of course the data in this book hundred per cent guarantees there is no doubt in it you know.

Marie Slaughter:

This Python 3 Text Processing with NLTK 3 Cookbook are reliable for you who want to be described as a successful person, why. The key reason why of this Python 3 Text Processing with NLTK 3 Cookbook can be one of the great books you must have is definitely giving you more than just simple reading through food but feed an individual with information that might be will shock your earlier knowledge. This book is usually handy, you can bring it just about everywhere and whenever your conditions both in e-book and printed versions. Beside that this Python 3 Text Processing with NLTK 3 Cookbook forcing you to have an enormous of experience such as rich vocabulary, giving you test of critical thinking that we all know it useful in your day exercise. So , let's have it and revel in reading.

Christie Rich:

This book untitled Python 3 Text Processing with NLTK 3 Cookbook to be one of several books this best seller in this year, that is because when you read this guide you can get a lot of benefit on it. You will easily to buy this specific book in the book shop or you can order it by way of online. The publisher of this book sells the e-book too. It makes you quickly to read this book, since you can read this book in your Smart phone. So there is no reason to you personally to past this guide from your list.

Wanda Holmes:

What is your hobby? Have you heard that question when you got students? We believe that that question was given by teacher to their students. Many kinds of hobby, Every individual has different hobby. Therefore you know that little person including reading or as studying become their hobby. You need to know that reading is very important as well as book as to be the point. Book is important thing to incorporate you knowledge, except your teacher or lecturer. You will find good news or update about something by book. A substantial number of sorts of books that can you take to be your object. One of them are these claims Python 3 Text Processing with NLTK 3 Cookbook.
