A System of Systems Interface Hazard Analysis Technique

Patrick Redmond

A System of Systems Interface Hazard Analysis Technique Patrick Redmond

The next generation of military capabilities will hinge on systems of systems technologies, entailing the integration of numerous large scale systems into a complex system of systems whose capability exceeds the capabilities of the individual systems. The increase in capability is due to the emergent properties of the system of systems. However, these emergent properties also introduce hazards that must be adequately dealt with before the system of systems can be employed. The current state of hazard analysis processes is insufficient to deal with the complexity and size of a system of systems. This thesis aims to define the nature and types of hazards associated with systems of systems and to define a technique for identifying specific hazards within a system of systems. In addition to developing a theoretical process, this thesis applies it to a real world case study, the Ballistic Missile Defense System. A software application was developed to prove the concept of the hazard analysis technique. The technique has been designed from the top down to be compatible with current system safety processes and as such, is directly compatible with systems of systems currently in development and familiar to practicing system safety engineers.

From reader reviews:

Rebecca Burks:

Do you certainly one of people who can't read pleasurable if the sentence chained inside the straightway, hold on guys that aren't like that. This A System of Systems Interface Hazard Analysis Technique book is readable through you who hate the perfect word style. You will find the information here are arrange for enjoyable looking at experience without leaving even decrease the knowledge that want to give to you. The writer associated with A System of Systems Interface Hazard Analysis Technique content conveys prospect easily to understand by lots of people. The printed and e-book are not different in the content material but it just different such as it. So , do you even now thinking A System of Systems Interface Hazard Analysis Technique is not loveable to be your top listing reading book?

Kimberly Williams:

This A System of Systems Interface Hazard Analysis Technique is great publication for you because the content which can be full of information for you who always deal with world and get to make decision every minute. This book reveal it info accurately using great arrange word or we can claim no rambling sentences included. So if you are read the item hurriedly you can have whole facts in it. Doesn't mean it only will give you straight forward sentences but challenging core information with wonderful delivering sentences. Having A System of Systems Interface Hazard Analysis Technique in your hand like getting the world in your arm, data in it is not ridiculous one particular. We can say that no e-book that offer you world in ten or fifteen small right but this reserve already do that. So , this really is good reading book. Hi Mr. and Mrs. stressful do you still doubt which?

Alan Durham:

Many people spending their period by playing outside having friends, fun activity along with family or just watching TV all day long. You can have new activity to spend your whole day by looking at a book. Ugh, do you think reading a book can really hard because you have to bring the book everywhere? It ok you can have the e-book, bringing everywhere you want in your Cell phone. Like A System of Systems Interface Hazard Analysis Technique which is keeping the e-book version. So , try out this book? Let's view.

James McNally:

This A System of Systems Interface Hazard Analysis Technique is new way for you who has attention to look for some information mainly because it relief your hunger of information. Getting deeper you onto it getting knowledge more you know otherwise you who still having little digest in reading this A System of Systems Interface Hazard Analysis Technique can be the light food for yourself because the information inside this book is easy to get through anyone. These books produce itself in the form which is reachable by anyone, that's why I mean in the e-book application form. People who think that in guide form make them feel sleepy even dizzy this e-book is the answer. So there is absolutely no in reading a reserve especially this

one. You can find what you are looking for. It should be here for a person. So , don't miss the idea! Just read this e-book kind for your better life as well as knowledge.
