Fixed Stars and Judicial Astrology George C. Noonan

Perhaps the least understood and most misused elements in astrology today are the fixed stars. Current practice is to consider the stars as no more than mini-manifestations of the planets whose nature they are presumed to hold. The locations of the stars projected onto the ecliptic are then considered valid points for aspectual relationships. No special significance is attributed to the non-zodiacal constellations; nor is a star's location within a constellation given any weight whatsoever. Finally, modern astrology places no distinction on the use of the stars and constellations in genethliacal astrology and the other branches of the ancient art. In this book the natures of the fixed stars and constellations as known by the classicists are discussed in detail. Methods of delineating the fixed stars are indicated, with special emphasis on the applications to judicial astrology. Included are chapters on the nature of the fixed stars; the northern, southern and zodiacal constellations; genethliacal applications of the fixed stars; judicial astrology; and three appendices with information on mathematics and rulership and a complete listing of the fixed stars.
