Laser Welding W. W. Duley

A Comprehensive overview of the theory and applications of laser welding

This complete and up-to-date overview examines both the state of the art and likely future directions of laser welding technology. Paying particular attention to manufacturing, where applications of laser welding range from vehicle assembly to the joining of microelectric components, this comprehensive volume reviews the fundamentals, examines the latest research data, and offers detailed coverage of practical applications. The emphasis is on optimizing laser welding techniques to achieve defect-free results at high speed and under reproducible conditions. Author Walter W. Duley also discusses design issues, material properties, and the efficient delivery of laser radiation in welding applications, as well as the practical aspects of joint design. Other important features of this book include:

- * Comprehensive data on real-world laser welding applications, including the new application of tailor blanking
- * Performance criteria for numerous laser welding systems
- * A review of available welding data for various metals and other materials
- * A section on laser welding diagnostics and monitoring techniques
- * Over 160 illustrations
- * Extensive references and a bibliography for specific industrial applications.

Laser Welding is an indispensable resource for engineers and scientists using laser welding technology and a useful text for students in physics, material science, and mechanical engineering. It is also a valuable reference for researchers and designers developing new laser welding systems and studying the laser welding process. Walter W. Duley is a professor at the University of Waterloo in Ontario, Canada, and is the founder and former chairman of Powerlasers Limited. His previous books include UV Lasers: Effects and Applications in Materials Science, Laser Processing and Analysis of Materials, and CO2 Lasers: Effects and Applications.

From reader reviews:

Robert Qualls:

The book Laser Welding can give more knowledge and also the precise product information about everything you want. Why must we leave the best thing like a book Laser Welding? Some of you have a different opinion about publication. But one aim which book can give many facts for us. It is absolutely appropriate. Right now, try to closer together with your book. Knowledge or info that you take for that, you could give for each other; you can share all of these. Book Laser Welding has simple shape but you know: it has great and big function for you. You can appear the enormous world by wide open and read a publication. So it is very wonderful.

Allison Phelps:

Hey guys, do you really wants to finds a new book to see? May be the book with the subject Laser Welding suitable to you? Often the book was written by popular writer in this era. The particular book untitled Laser Weldingis the one of several books that will everyone read now. This specific book was inspired many men and women in the world. When you read this publication you will enter the new shape that you ever know previous to. The author explained their thought in the simple way, so all of people can easily to comprehend the core of this publication. This book will give you a lots of information about this world now. To help you to see the represented of the world on this book.

Albert Christensen:

Reading a e-book can be one of a lot of activity that everyone in the world adores. Do you like reading book so. There are a lot of reasons why people enjoy it. First reading a reserve will give you a lot of new data. When you read a e-book you will get new information because book is one of numerous ways to share the information or their idea. Second, reading a book will make a person more imaginative. When you reading through a book especially fiction book the author will bring one to imagine the story how the characters do it anything. Third, you are able to share your knowledge to some others. When you read this Laser Welding, you could tells your family, friends as well as soon about yours guide. Your knowledge can inspire the others, make them reading a e-book.

Timothy Wingo:

Reading a publication make you to get more knowledge from this. You can take knowledge and information from a book. Book is created or printed or highlighted from each source that filled update of news. In this particular modern era like today, many ways to get information are available for you actually. From media social such as newspaper, magazines, science reserve, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Ready to spend your spare time to spread out your book? Or just in search of the Laser Welding when you required it?
