This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1921 Excerpt: ...

CHAPTER VII GENERAL MACHINE SHOP Machinery and Methods--General. To describe the many processes which various parts of the engine undergo in the general machine shop would be a task far beyond the possibilities of this book. This shop is provided with the lathes, planing, shaping, and slotting machines such as are to be found in all large engineering shops, and in addition there are many special modern tools, such as automatic lathes for making stays, pins, studs, etc., grinding machinery, and above all, milling machines. Formerly the machining was performed on the first mentioned machine tools of standard pattern, and then passed on to the fitters to be finished by filing, scraping and the other well known fitters' methods. Nowadays the work is done and completed as far as possible on milling and grinding machines, so that as little fitting as possible is required, many of the parts going direct from the machines to the erecting shop to be put together on the engine. The former processes of planing, shaping and slotting are now very largely replaced by milling. In milling machines the work is machined by revolving vertical or horizontal serrated cutters, which produce a fine finished smooth surface. These cutters can be shaped, or two or three of them put together, to mill out irregular curves and grooves, and so save a vast amount of labour formerly required from the fitters. Slide bars, piston rods, and many other parts are ground to size on grinding machines by means of emery or corundum wheels revolving at high speeds. The work is all done to limit gauges, and can be finished within 0-0005 in. if required. When a large quantity of similar pieces are to be made, they are machined in "jigs" or "fixtures." These are attachments bolted...

From reader reviews:

Brandon Huff:

What do you think of book? It is just for students since they are still students or the item for all people in the world, exactly what the best subject for that? Just simply you can be answered for that concern above. Every person has diverse personality and hobby per other. Don't to be obligated someone or something that they don't need do that. You must know how great and important the book Steam locomotive construction and maintenance, describing workshop equipment and practice in the construction of modern steam railway locomotives; ... inspection, testing, maintenance and repairs. All type of book would you see on many sources. You can look for the internet options or other social media.

Micah Best:

This Steam locomotive construction and maintenance, describing workshop equipment and practice in the construction of modern steam railway locomotives; ... inspection, testing, maintenance and repairs usually are reliable for you who want to certainly be a successful person, why. The explanation of this Steam locomotive construction and maintenance, describing workshop equipment and practice in the construction of modern steam railway locomotives; ... inspection, testing, maintenance and repairs can be one of several great books you must have is giving you more than just simple reading food but feed you with information that maybe will shock your before knowledge. This book is definitely handy, you can bring it just about everywhere and whenever your conditions throughout the e-book and printed people. Beside that this Steam locomotive construction and maintenance, describing workshop equipment and practice in the construction of modern steam railway locomotives; ... inspection, testing, maintenance and repairs giving you an enormous of experience for example rich vocabulary, giving you trial run of critical thinking that we know it useful in your day exercise. So , let's have it and revel in reading.

Selma McDaniel:

People live in this new day time of lifestyle always try to and must have the time or they will get lots of stress from both daily life and work. So , whenever we ask do people have extra time, we will say absolutely yes. People is human not only a robot. Then we request again, what kind of activity are you experiencing when the spare time coming to anyone of course your answer will probably unlimited right. Then do you try this one, reading publications. It can be your alternative within spending your spare time, the actual book you have read is Steam locomotive construction and maintenance, describing workshop equipment and practice in the construction of modern steam railway locomotives; ... inspection, testing, maintenance and repairs.

Stephen Stansbury:

Playing with family in the park, coming to see the ocean world or hanging out with pals is thing that usually you will have done when you have spare time, after that why you don't try thing that really opposite from

that. Just one activity that make you not sense tired but still relaxing, trilling like on roller coaster you already been ride on and with addition info. Even you love Steam locomotive construction and maintenance, describing workshop equipment and practice in the construction of modern steam railway locomotives; ... inspection, testing, maintenance and repairs, you may enjoy both. It is very good combination right, you still desire to miss it? What kind of hang-out type is it? Oh can occur its mind hangout fellas. What? Still don't get it, oh come on its identified as reading friends.
