Building Machine Learning Systems with Python Willi Richert, Luis Pedro Coelho

As the Big Data explosion continues at an almost incomprehensible rate, being able to understand and process it becomes even more challenging. With *Building Machine Learning Systems with Python*, you'll learn everything you need to tackle the modern data deluge - by harnessing the unique capabilities of Python and its extensive range of numerical and scientific libraries, you will be able to create complex algorithms that can 'learn' from data, allowing you to uncover patterns, make predictions, and gain a more in-depth understanding of your data.

Featuring a wealth of real-world examples, this book provides gives you with an accessible route into Python machine learning. Learn the Iris dataset, find out how to build complex classifiers, and get to grips with clustering through practical examples that deliver complex ideas with clarity. Dig deeper into machine learning, and discover guidance on classification and regression, with practical machine learning projects outlining effective strategies for sentiment analysis and basket analysis. The book also takes you through the latest in computer vision, demonstrating how image processing can be used for pattern recognition, as well as showing you how to get a clearer picture of your data and trends by using dimensionality reduction.

Keep up to speed with one of the most exciting trends to emerge from the world of data science and dig deeper into your data with Python with this unique data science tutorial.

- Learn how to create machine learning algorithms using the flexibility of Python
- Get to grips with scikit-learn and other Python scientific libraries that support machine learning projects
- Employ computer vision using mahotas for image processing that will help you uncover patterns and trends in your data
- Learn topic modelling and build a topic model for Wikipedia
- Analyze Twitter data using sentiment analysis
- Get to grips with classification and regression with real-world examples

From reader reviews:

Julius Montanez:

Have you spare time for just a day? What do you do when you have more or little spare time? That's why, you can choose the suitable activity with regard to spend your time. Any person spent their spare time to take a stroll, shopping, or went to typically the Mall. How about open or perhaps read a book titled Building Machine Learning Systems with Python? Maybe it is being best activity for you. You understand beside you can spend your time along with your favorite's book, you can wiser than before. Do you agree with it is opinion or you have various other opinion?

Clyde Welch:

The actual book Building Machine Learning Systems with Python will bring you to the new experience of reading the book. The author style to describe the idea is very unique. Should you try to find new book to read, this book very appropriate to you. The book Building Machine Learning Systems with Python is much recommended to you to read. You can also get the e-book in the official web site, so you can quicker to read the book.

Thomas Brim:

You may spend your free time to see this book this book. This Building Machine Learning Systems with Python is simple to bring you can read it in the park your car, in the beach, train and also soon. If you did not have got much space to bring often the printed book, you can buy the actual e-book. It is make you quicker to read it. You can save the particular book in your smart phone. Thus there are a lot of benefits that you will get when one buys this book.

Gregory Sims:

Many people spending their time by playing outside having friends, fun activity along with family or just watching TV the whole day. You can have new activity to enjoy your whole day by studying a book. Ugh, do you think reading a book can actually hard because you have to bring the book everywhere? It okay you can have the e-book, taking everywhere you want in your Smart phone. Like Building Machine Learning Systems with Python which is keeping the e-book version. So , why not try out this book? Let's view.
