Data Structures and Algorithm Analysis in C++, Third Edition (Dover Books on Computer Science)

Dr. Clifford A. Shaffer

With its focus on creating efficient data structures and algorithms, this comprehensive text helps readers understand how to select or design the tools that will best solve specific problems. It uses *Microsoft C++* as the programming language and is suitable for second-year data structure courses and computer science courses in algorithm analysis.

Techniques for representing data are presented within the context of assessing costs and benefits, promoting an understanding of the principles of algorithm analysis and the effects of a chosen physical medium. The text also explores tradeoff issues, familiarizes readers with the most commonly used data structures and their algorithms, and discusses matching appropriate data structures to applications. The author offers explicit coverage of design patterns encountered in the course of programming the book's basic data structures and algorithms. Numerous examples appear throughout the text.

From reader reviews:

Christina Ochs:

Reading a guide can be one of a lot of activity that everyone in the world loves. Do you like reading book thus. There are a lot of reasons why people enjoyed. First reading a guide will give you a lot of new facts. When you read a guide you will get new information due to the fact book is one of various ways to share the information or maybe their idea. Second, examining a book will make an individual more imaginative. When you looking at a book especially fiction book the author will bring that you imagine the story how the personas do it anything. Third, you may share your knowledge to others. When you read this Data Structures and Algorithm Analysis in C++, Third Edition (Dover Books on Computer Science), you could tells your family, friends as well as soon about yours reserve. Your knowledge can inspire different ones, make them reading a publication.

Richard Bennett:

The book untitled Data Structures and Algorithm Analysis in C++, Third Edition (Dover Books on Computer Science) is the publication that recommended to you to study. You can see the quality of the e-book content that will be shown to an individual. The language that publisher use to explained their way of doing something is easily to understand. The copy writer was did a lot of analysis when write the book, to ensure the information that they share for you is absolutely accurate. You also could possibly get the e-book of Data Structures and Algorithm Analysis in C++, Third Edition (Dover Books on Computer Science) from the publisher to make you considerably more enjoy free time.

Joseph Lewis:

People live in this new moment of lifestyle always make an effort to and must have the spare time or they will get large amount of stress from both way of life and work. So , if we ask do people have free time, we will say absolutely of course. People is human not really a robot. Then we question again, what kind of activity have you got when the spare time coming to you of course your answer will unlimited right. Then ever try this one, reading books. It can be your alternative throughout spending your spare time, typically the book you have read is Data Structures and Algorithm Analysis in C++, Third Edition (Dover Books on Computer Science).

Cleora Yarbrow:

As we know that book is essential thing to add our know-how for everything. By a publication we can know everything we wish. A book is a group of written, printed, illustrated or perhaps blank sheet. Every year was exactly added. This publication Data Structures and Algorithm Analysis in C++, Third Edition (Dover Books on Computer Science) was filled concerning science. Spend your extra time to add your knowledge about your research competence. Some people has several feel when they reading a book. If you know how big good thing about a book, you can really feel enjoy to read a e-book. In the modern era like right now, many

ways to get book that you simply wanted.
