Levels of Selection in Evolution

Levels of Selection in Evolution

Ever since the groundbreaking work of George Williams, W. D. Hamilton, and Richard Dawkins, evolutionary biologists have recognized that natural selection generally does not operate for the good of the group, but rather for the good of lower-level units such as the individual, the cell, even the gene. One of the fundamental problems of biology is: what keeps competition between these various levels of natural selection from destroying the common interests to be gained from cooperation? In this volume twelve prominent scientists explore this question, presenting a comprehensive survey of the current theoretical and empirical research in evolutionary biology.

Recent studies show that at many levels of biological organization, mechanisms have evolved to prevent potential conflict in natural selection. Editor Laurent Keller's aim in this book is to bring together leading researchers from all biological disciplines to outline these potential conflicts and discuss how they are resolved. A multi-level approach of this kind allows important insights into the evolution of life, as well as bridging the long-standing conceptual chasm between molecular and organismal biologists. The chapters here follow a rigorous theoretical framework, giving the book an overall synergy that is unique to multi-authored books.

The contributors, in addition to the editor, are H. Charles J. Godfray, Edward Allen Herre, Dawn M. Kitchen, Egbert Giles Leigh, Jr., Catherine M. Lessells, Richard E. Michod, Leonard Nunney, Craig Packer, Andrew Pomiankowski, H. Kern Reeve, John Maynard Smith, and Eörs Szathmáry.

From reader reviews:

Monica Ceja:

Do you certainly one of people who can't read satisfying if the sentence chained inside straightway, hold on guys this kind of aren't like that. This Levels of Selection in Evolution book is readable by you who hate those perfect word style. You will find the details here are arrange for enjoyable reading through experience without leaving possibly decrease the knowledge that want to deliver to you. The writer regarding Levels of Selection in Evolution content conveys the idea easily to understand by many people. The printed and e-book are not different in the written content but it just different by means of it. So , do you nonetheless thinking Levels of Selection in Evolution is not loveable to be your top checklist reading book?

David Lacey:

Information is provisions for those to get better life, information today can get by anyone on everywhere. The information can be a expertise or any news even an issue. What people must be consider if those information which is within the former life are challenging to be find than now could be taking seriously which one works to believe or which one the actual resource are convinced. If you receive the unstable resource then you get it as your main information we will see huge disadvantage for you. All those possibilities will not happen within you if you take Levels of Selection in Evolution as the daily resource information.

Melissa Conner:

Your reading 6th sense will not betray you actually, why because this Levels of Selection in Evolution publication written by well-known writer who knows well how to make book which can be understand by anyone who have read the book. Written within good manner for you, leaking every ideas and composing skill only for eliminate your own hunger then you still doubt Levels of Selection in Evolution as good book not just by the cover but also from the content. This is one e-book that can break don't ascertain book by its cover, so do you still needing one more sixth sense to pick this specific!? Oh come on your looking at sixth sense already told you so why you have to listening to another sixth sense.

Kimberly Gomez:

Don't be worry in case you are afraid that this book will probably filled the space in your house, you may have it in e-book method, more simple and reachable. This kind of Levels of Selection in Evolution can give you a lot of pals because by you investigating this one book you have matter that they don't and make an individual more like an interesting person. This kind of book can be one of a step for you to get success. This publication offer you information that possibly your friend doesn't recognize, by knowing more than different make you to be great persons. So , why hesitate? Let's have Levels of Selection in Evolution.
