Wildlife Science: Connecting Research with Management

Wildlife Science: Connecting Research with Management

Despite the potential synergy that can result from basing management applications on results from research, there is a polarization of cultures between wildlife managers and wildlife researchers. **Wildlife Science: Connecting Research with Management** provides strategies for bridging cultural and communication gaps between these groups.

Contributors present case studies highlighting the role of state and federal agencies and private organizations in management and research; the lingering disconnects between grassland birds, quail, and deer research and management; as well as the development of management techniques from field research, rangelands management, and ranch management.

Case Studies:

- The Disconnect between Quail Research and Quail Management
- Sage-Grouse (*Centrocercus urophasianus*) and the Disconnect between Research and Management on Public Lands in the American West
- Ecological Goals, not Standardized Methods, are needed to Create and Maintain Habitat for Grassland Birds
- A Historic Perspective of the Connectivity between Waterfowl Research and Management
- Deer in the Western United States
- Whitetail deer (*Odocoileus virginianus*) in the Eastern United States
- Impacts of Wind Energy Development on Wildlife: Challenges and Opportunities for Integrated Science, Management, and Policy
- The Role of Joint Ventures in Bridging the Gap between Research and Management
- Developing Management Strategies from Research: the Pushmataha Forest
