Application of Evolutionary Algorithms for Multi-objective Optimization in VLSI and Embedded Systems

Application of Evolutionary Algorithms for Multi-objective Optimization in VLSI and Embedded Systems

This book describes how evolutionary algorithms (EA), including genetic algorithms (GA) and particle swarm optimization (PSO) can be utilized for solving multi-objective optimization problems in the area of embedded and VLSI system design. Many complex engineering optimization problems can be modelled as multi-objective formulations. This book provides an introduction to multi-objective optimization using meta-heuristic algorithms, GA and PSO and how they can be applied to problems like hardware/software partitioning in embedded systems, circuit partitioning in VLSI, design of operational amplifiers in analog VLSI, design space exploration in high-level synthesis, delay fault testing in VLSI testing and scheduling in heterogeneous distributed systems. It is shown how, in each case, the various aspects of the EA, namely its representation and operators like crossover, mutation, etc, can be separately formulated to solve these problems. This book is intended for design engineers and researchers in the field of VLSI and embedded system design. The book introduces the multi-objective GA and PSO in a simple and easily understandable way that will appeal to introductory readers.

From reader reviews:

Raul Joyner:

What do you in relation to book? It is not important with you? Or just adding material if you want something to explain what the one you have problem? How about your time? Or are you busy man or woman? If you don't have spare time to accomplish others business, it is make you feel bored faster. And you have extra time? What did you do? Everybody has many questions above. They must answer that question since just their can do that will. It said that about reserve. Book is familiar on every person. Yes, it is suitable. Because start from on kindergarten until university need this kind of Application of Evolutionary Algorithms for Multi-objective Optimization in VLSI and Embedded Systems to read.

Lynn Gowen:

As people who live in often the modest era should be upgrade about what going on or facts even knowledge to make them keep up with the era and that is always change and progress. Some of you maybe will probably update themselves by reading through books. It is a good choice for you but the problems coming to a person is you don't know what type you should start with. This Application of Evolutionary Algorithms for Multi-objective Optimization in VLSI and Embedded Systems is our recommendation so you keep up with the world. Why, because this book serves what you want and wish in this era.

Edith Stewart:

Application of Evolutionary Algorithms for Multi-objective Optimization in VLSI and Embedded Systems can be one of your beginning books that are good idea. Many of us recommend that straight away because this book has good vocabulary that will increase your knowledge in terminology, easy to understand, bit entertaining but still delivering the information. The article author giving his/her effort that will put every word into pleasure arrangement in writing Application of Evolutionary Algorithms for Multi-objective Optimization in VLSI and Embedded Systems but doesn't forget the main point, giving the reader the hottest and also based confirm resource information that maybe you can be one of it. This great information can certainly drawn you into brand-new stage of crucial pondering.

Alex Santana:

Don't be worry for anyone who is afraid that this book will certainly filled the space in your house, you will get it in e-book means, more simple and reachable. This Application of Evolutionary Algorithms for Multi-objective Optimization in VLSI and Embedded Systems can give you a lot of pals because by you considering this one book you have factor that they don't and make you more like an interesting person. This particular book can be one of a step for you to get success. This publication offer you information that perhaps your friend doesn't recognize, by knowing more than various other make you to be great persons. So , why hesitate? We should have Application of Evolutionary Algorithms for Multi-objective Optimization in VLSI and Embedded Systems.
